

Donielle Williams

Dr. Donielle Williams is currently completing a residency in Pediatric Dentistry at UCLA-Westwood. She graduated Magna Cum Laude from Xavier University of Louisiana with a BS in Biology, and she received her Doctorate of Dental Medicine Degree from the University of Alabama at Birmingham School of Dentistry.

Throughout her dental school career, Donielle volunteered at various Federally Qualified Health Centers, went on mission trips, and organized service events to provide free dental care to the public, which sparked her interests in public health and improving access to care for underserved populations. Donielle is passionate about the opportunity to create ways to increase the oral health literacy of patients and implement plans to make dentistry more affordable for low-income families utilizing a public health platform.

Donielle grew up as a military brat and has lived in nine different cities; however she affectionately refers to the state of Georgia as her “home”. In her free time, Donielle enjoys attending Alabama football games (ROLL TIDE!), fishing, traveling, watching movies, and spending time with family and friends.
